

ROBOTINATOR9000 MANUAL

WHAT IS THIS MANUAL ABOUT?

This patent pending unique AVG, constructed only with **LEGO™** bricks using the **LEGO™ MINDSTORM® EV3©** technology, is the first of its kind robot to be able to follow a three colored line, pick-up and object and drop it off at the designated location all with only one mouse click. It's the **ROBOTINATOR9000**.

HOW TO USE IT?

We here at **Class EPO-1 Group 2(FIS 2)** really care about the user experience, therefore poured efforts into creating a simplistic, yet intuitive controls to allow you the best experience possible. We present to you, the patent pending, **THREE BUTTONS!**

Not only are they easy to understand, but they work great, allowing you to initiate the process using the “play” button, pause the process with the “pause” button and stop the process altogether with the “X” button.

In addition we wanted to present to you some interesting information about the AVG, while it is working, therefore we added this unique progress bar and the current color being detected by your awesome robot!
